Stop end ZS-LUX and ZS-FLAT finishing element of top ridge cap GS-LUX and GSM-FLAT

New
in offer

Elements fixed to ridge caps at the hip end.

They ensure aesthetic and functional roof finish while maintaining material homogeneity.

Features and references

- The ideal factory-made Hip End Caps for GS-LUX and GSM-FLAT provide excellent protection against precipitation and pollution getting under the ridge caps.
- Shapes tailored to GS-LUX and GSM-FLAT ridge caps eliminate the need for hand-made elements on the construction site.
- Quick and easy assembly of elements using farmer screws, TORX or coated rivets.
- Made of one element in the deep drawing process.
- They are characterized by their perfect profiling and decorative shape.
- High quality of material and precision in making the product guarantee perfect, durable and exceptionally aesthetic roof finish.
- Guarantee of compatibility and color consistency with GS-LUX and GSM-FLAT ridge caps.
- The elements are an integral part of the remaining roof flashings.
